Supastream Pool and Spa Pumps

Efficient Impeller and Diffuser Design

The pump's impeller and diffuser design maximizes the hydraulic output of the pump while minimizing turbulence. The pump's efficient hydraulic performance shortens run times and reduces energy consumption leading to lower operating costs.

Engineered Durability

The pump body is manufactured utilizing state of the art engineering plastic molding with a single piece strainer pot and volute for extra strength. A high grade 316 stainless steel mechanical seal is incorporated for extra protection against corrosion e.g. from chlorinated water, ozone, iodine, Baquacil, bromine and salt water.

Motor:

- Motor shaft 303 grade stainless steel.
- Fan cooled.
- Thermal overload
